NOTICE: *We are gathering on Saturday the 12th between 10am and 2pm at the Old Nordland Church Community Hall to **celebrate the Marrowstone Wireless Community**. Thanks to Bev Schaaf and Rick Kirkwood the property owners for allowing us to use the space!*

We may give Bucket Van rides to some brave souls! I am bringing soda pop and water. Feel free to bring finger food (I think Laurel mentioned deviled eggs, yum!) but, you don't have to do anything just show up and say howdy!

Bring friends and questions. Bring ideas too. Ever wondered how we connect two fiber glass hairs together? We will try to do it in public without breaking them!!!

Looking over what I wrote so far, I highly recommend taking the bucket ride before eating so we all keep our hats clean...

I think you know the Hall has very limited parking so, bring your walking shoes just in case. There is a surprise announcement so, be sure to come. I will try to do the announcement right about noon. PLEASE DO COME !

Well, things are moving along in our Fiberhoods. At Griffith Point we are steadily adding new clients. In the lab, new equipment is arriving that will become the Robbins Fiberhood "Fiber Head-End control system" to be mounted on a PUD power pole at the corner where Robbins goes up hill from the west side.

This is an exciting time for us as we have now entered well into our 4th year of operation.

Right now I have to decide if I should wash the pollen off the truck or mow the grass, again.

A nap might be nice...

Joy and Peace, David
