

## August 3, 2021 - Shock! And AWE!

### *Shock!*

On June 26th we received written notice that the private property in Greenbank on Whidbey Island that has hosted our original radio 20' tower has been sold and we needed to scramble to move and still keep our clients on the north east coast served!

This was totally out of the blue. The property had not even been on the market. A shock!

Once a radio tower site is activated with nearly 100 client radios carefully aimed at it over 6 years, the concept of what is needed to re-locate radios to a new tower site was overwhelming.

Over the next couple weeks of study of the area, one site would work easily and was only 100 feet away and, after initial approach was looking very good but, the landowner finally decided not to host us.

Arriving on Whidbey very early one day I spent time walking and seeking a workable ground site in the area. Discouraged, I sat down in my car and prayed for guidance...

...I called my friends at Whidbey Telecom to see if they had any ideas. This call ended up in a field meeting just 1,200 feet away from our present site to the site of a 190 foot tower that sticks above the trees belonging to WhidbeyTel that has some space at the top...

### *Awe!*

On July 29th a second draft of a new contract with WhidbeyTel on placing our radios on that tower was submitted with all signs indicating this will happen. For me, the power of prayer and the Glory of God formed true awe in my heart!

Peace, David
