

August 3, 2023 - Jeepers! A Happy Thing to Report!

Over the past few months the world, our nation and our county have seen much change and just now we are personally starting to see and feel many changes. Rather than address those issues I am most pleased to tell you a happy thing:

You may recall in our February 2022 newsletter that we bought a 2005 Jeep Liberty CRD diesel vehicle to deal with our unpredictable weather. All was well for a couple months until it developed a leak under the hood.

Remember how we used to play with Dominoes setting them up in a line to trigger them to all fall down when we just pushed on the first one? Seeking that leak in the Jeep at the beginning of last summer caused much the same result as I tried to do all the work on it myself. I soon realized I no longer have the physical strength to do some of what I could do a short time ago. So, I got some young blood to help me over a couple of bumps but, still months went by...

Happy July! On the 21st of last month I took it on its first test run in over a year! Obviously, from the photo I did not finish the front end assembly before the test run...

You may have seen it on the Island this past couple weeks with our signs as we put it back into service. When I say "we" I can now say that it is not always me behind the wheel but, my youngest son, Nathan, possibly driving! Nathan has moved from Oregon just in time to help me put the final assembly touches on the Jeep.

Long live our Liberty!

Peace, David
