

August 4, 2022 - Hello? Testing, 1,2,3. Is this channel working?

Some good news! We have received compensation from the “Dump Truck-Fiber” accident but, the wait of 3 months has tied up cash flow postponing needed work that we had planned for the warm good weather. Supplies for expanding our Fiber Network could not be ordered in a timely manner causing a delay in connecting new clients during this prime weather period. Supplies are now on order and some items may show up by next week.

Of course, we were still very busy due to the Cyber Attack recovery and are just now testing our capability to send out this newsletter to the correct clients and email addresses. So, this is our first attempt to send out the newsletter since the cyber setback. (Yes, we had to skip the July newsletter.)

In June’s newsletter, we talked about changing from our 30-year old Port Townsend P.O. Box to a new P.O. box in Port Hadlock. I need to remind many of you to please take time to change the information in your automatic “BillPay” monthly payments to the new correct address:

Marrowstone Wireless
P.O. Box 1439
Port Hadlock, WA 98339

Finally, we are now needing to be able to change where we bank company funds. That means a few of our clients will need to change how they pay our invoices. (If you are currently mailing a check or using “BillPay” you are fine!)

We need to disallow direct deposit “ACH” payments and “PayPal” payments to be able to change our bank as business may require.

Folks currently using “ACH” or “PayPal” payment methods need to switch to using either the free “BillPay” auto payment system or send a check payment to the new P.O. Box 1439 in Port Hadlock, WA 98339. Thanks for understanding!

Peace, David
David G. Brader, President, MACaid, Inc. dba Marrowstone Wireless
