

MARROWSTONE WIRELESS

a DBA of MACaid, Inc.

September 1, 2017

What happened to August? Well, a bunch of things took place for MW:

- A surprising number of new MW clients signed on.
- Custom Fiberoptic cable arrived for the Griffith Point FTTH project.
- MW supported the live feed from the Old Nordland Church for KPTZ radio.

I thought one photo would cover most of this news. Below, on the day of the live KPTZ feed you can see my old Chevy S10 overfilled with spools of custom Fiberoptic cable with the Old Nordland Church in the background.

Next up, testing Fiberoptic cable install techniques...

Enjoy this extended summer! Peace, David
