

MARROWSTONE WIRELESS

Hybrid Networks

a registered trademark of MACaid, Inc.

October 11, 2023 - Marrowstone Wireless has NOT BEEN SOLD...

Thanks to you Marrowstone Wireless clients that alerted me to the rumor on NextDoor: North Olympic Peninsula Data Centers (NOPDC) does not own Marrowstone Wireless! (Marrowstone Wireless is a trade name of MACaid, Inc. which I started in 1992.)

We did agree to sell our stand-alone turnkey FTTH (Fiber To The Home) network assets to NOPDC.

That FTTH portion of our business was only 1/3rd of our total operation. Marrowstone Wireless is now back to being what it always has been about since 2014, a wireless Internet Access Provider.

Two years ago we tripled our capacity with wireless transmitters mounted 750 foot above sea level on Whidbey Island. This advanced system has 24/7 power backup that will last weeks in a major power outage!

The photo shows our system at the very top of the tower. Many of you served via our radio systems have noticed that during PUD power outages our Marrowstone Wireless Internet system is still functioning (if you have backup power for your router and radio). This can be a real advantage for emergencies, to have your Internet still up! Roughly 75% of you have this feature. For you other 25%, we are currently investing in battery backup systems that can automatically keep our transmitters alive over a 4 day outage for our Meade Hill and Nordland inland areas!

...

Peace, David
